King County DNRP Water Quality Index

STATION

VA42A

WATER YEAR

2018

GAUGE#

28a Judd Creek, Vashon Island

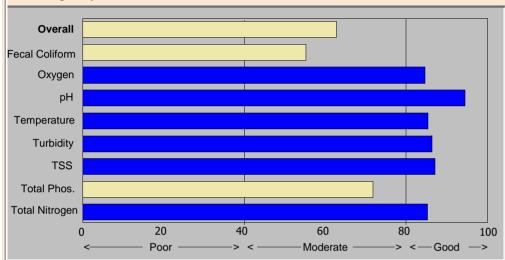

Overall Index

63

Station VA42A is located upstream of the mouth of Judd Creek at the SW 225th Street crossing on private property on Vashon Island. Judd Creek was sampled from 2006 through 2008, and then monitoring resumed in 2013. Judd Creek empties into the northwest end of Quartermaster Harbor. All of Vashon-Maury Island is designated as rural and is therefore outside the urban growth boundary. The creek is on the Washington State Department of Ecology's 303(d) list, Category 5, for violations of temperature standards. Judd Creek is also listed for bioassessment scores that indicate that biological integrity is degraded.

Annual Water Quality Index Scores

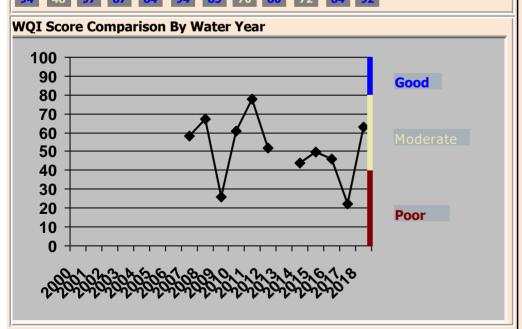

Water quality was MODERATE based on data collected 10/1/2017 to 9/30/2018.

Monthly Scores For Water Year 2018

Oct Nov Dec Jan Feb Mar Apr May Jun Jul Aug Sep

About The Water Quality Index:

The Water Quality Index (WQI) score is a unit-less number ranging from 10 to 100: the higher the number, the higher the water quality. Scores are calculated from data collected during the monthly routine sampling. For temperature, pH, fecal coliform bacteria, turbidity, and dissolved oxygen, the index expresses results relative to levels required to maintain beneficial uses according to criteria in Washington's Water Quality Standards, WAC 173-201A. For nutrient and sediment measures where there are no standard, results are expressed relative to guidelines for this eco-region. Results from the eight parameters are aggregated over time to produce a single score for each sample station. In general, stations scoring 80 and above did not fail water quality standards or guidelines and are of "low concern", scores 40 to 80 indicate "moderate concern", and water quality at stations with scores below 40 are of "high concern". For more information about the WQI please visit https://green2.kingcounty.gov/streamsdata/ WQI.aspx
